SHIRISH DALI

Developer | Designer | Musician

As a web developer, I transform ideas into clean code and user-friendly websites. In addition to my degree in Graphic Design and my continued education in Web Development, I bring with me powerful communication skills and a strong foundation in design principles. I seek to work with an innovative company on projects that have meaning and will make an impact.

EXPERIENCE

Albatross
Wordpress

Originally designed a template for the band site as a single page application. Integrated the band's multiple social media sites. Currently working on converting the template into wordpress and adding a blog and a forum.

The Lyricist
React App

Created a database of lyrics and seeded it into Mongo DB using Node. Developed the front-end using React JS creating components. Added a youtube search functionality using the YouTube API. Upon searching a song title, the app returned the user the lyrics of the song and the first four matches of the videos on youtube.

Petfinder
Node App

The app was designed to match people with adoptable pets. Developed the front-end based on the wireframe given by the UX/UI team. Seeded a database of animals using Node as well as used a Petfinder API. Created a questionnaire with a score system using Javascript. The people were then matched with adoptable animals depending on their score.

EDUCATION

GENERAL ASSEMBLY
October 2016
Austin, TX

Completed a 3-month intensive Web Development (WDI) course with a focus on Javascript and it's various libraries.
